SUMMARY

Career shifter with 1 year of professional experience and a graduate of a Full-Stack Web Development bootcamp. Skilled in frontend and backend development using HTML, CSS, JavaScript, React, Node.js, Express, and MongoDB. Hands-on experience building console-based and DOM-driven applications, as well as developing RESTful APIs and performing manual and regression testing. Background in recruitment within a fintech environment, bringing strong communication, organization, and problem-solving skills. Detail-oriented, highly motivated, and eager to grow as a junior developer while contributing as a reliable and adaptable team member.

SKILLS

TECHNICAL SKILLS

Frontend Development

- HTML5 (semantic structure, forms, accessibility basics)
- CSS3 (responsive design, Flexbox, layout systems)
- JavaScript (ES6+, DOM manipulation, event handling)
- React.js (components, props, state, basic hooks)

Frontend Development

- Node.js (runtime environment, basic server setup)
- Express.js (REST APIs, routing, middleware)
- MongoDB (CRUD operations, basic schema design)

Full Stack Development

- Building and connecting RESTful APIs
- Client-server architecture
- Basic authentication & data handling

JavaScript & Programming Fundamentals

- Variables, data types, operators
- Control flow (conditions, loops)
- Functions and scope
- Arrays & objects
- Pseudocoding
- Problem solving & logic formulation

Testing & Debugging

- Manual & regression testing
- Console debugging & breakpoints
- Chrome Developer Tools

Tools & Version Control

- Git & GitHub (basic workflow)
- Command Line Interface (CLI)
- Chrome Developer Tools

Artificial Intelligence

- Artificial Intelligence (AI) Fundamentals Machine Learning Basics
- Machine Learning Basics
- Natural Language Processing (NLP)
- Google Cloud Platform (GCP)
- AI-assisted Writing & Communication
- Claude AI
- OpenAI

SOFT SKILLS

- Problem Solving
- Attention to Detail
- Communication
- Adaptability
- Willingness to Learn

WORK EXPERIENCE

Salmon Ltd. – Recruitment Associate

May 2025 – PRESENT (2026)

- Handle end-to-end recruitment for Sales Ambassador roles, from sourcing to hiring
- Screen and assess candidates through interviews, ensuring alignment with role requirements and company standards
- Source candidates using job portals, social media, and referral recruitment methods
- Coordinate interview schedules, onboarding requirements, and deployment timelines
- Maintain and update candidate databases, trackers, and recruitment reports with accuracy
- Communicate clearly with candidates regarding application status, requirements, and next steps
- Support hiring targets by ensuring timely and efficient candidate processing
- Work closely with internal teams to address manpower needs and recruitment priorities

PROJECT EXPERIENCE

Built 8 full-stack web applications using React, Node.js, Express, MongoDB, and RESTful APIs

JavaScript Console Application (Educare Women App)

JavaScript,

- Built a console-based application using core JavaScript concepts
- Implemented control flow, functions, arrays, objects, and recursion
- Applied problem-solving techniques, pseudocoding, and debugging via console

Web Development Portfolio (Developer Portfolio)

HTML, CSS, JavaScript

- Designed and developed a personal web portfolio showcasing projects and skills

- Used semantic HTML, responsive CSS, and best practices in web structure
- Applied clean UI layout and accessibility-friendly markup

Vanilla JavaScript Web Application (Guess It or Get Roasted App)

HTML, CSS, JavaScript (DOM)

- Developed an interactive browser-based game based on clues and descriptions
- Implemented DOM manipulation, event handling, and dynamic UI updates
- Applied DRY principles with manual testing and debugging

Backend Application (Anchora Productivity App)

MongoDB, Express, Node.js, HTML, CSS, JavaScript

- Developed a full-stack productivity application with secure user authentication (JWT, bcrypt)
- Implemented features including task management (pending/completed), habit tracking, and journaling
- Built dynamic functionality where habits can generate related tasks
- Integrated a motivation feature that generates insights from journal entries
- Designed and developed RESTful APIs for full CRUD operations using Express and MongoDB
- Tested API endpoints using Postman, Jest, and Supertest
- Built a responsive frontend using HTML, CSS, and vanilla JavaScript with Fetch API integration
- Applied security and configuration best practices using dotenv, cors, and helmet

React Application (MakeShop E-commerce App)

React.js, JavaScript, CSS

- Developed a single-page e-commerce application using React.js
- Implemented client-side routing with React Router (Home, Product Details, Cart, Checkout)
- Built reusable components and dynamic product pages using route parameters
- Designed shopping cart and checkout functionality for user interaction
- Applied component-based architecture and state-driven UI rendering
- Created a *responsive* and user-friendly interface

Full-Stack MERN Team Project (LinkedIn Sweeper)

MongoDB, Express, React, Node.js

- Collaborated in a team to build a full-stack application for tracking alumni data
- Implemented data collection, filtering, and search functionality
- Developed both frontend and backend features using the MERN stack

Personal Portfolio Website

HTML, CSS, JavaScript, React

- Created a comprehensive portfolio showcasing all projects and technical skills
- Highlighted full-stack development capabilities and project experience
- Designed for responsiveness and user-friendly navigation

Intro and Requirements Dashboard

React, Vite, Supabase, Vercel, Anthropic API FHL, Claude AI

- Built a real-time candidate tracker integrated with Jira REST API for automated ticket imports, replacing manual data entry across 30+ merchant partners
- Developed a letter generator with 13 endorsement letter templates that auto-fill candidate data and download as formatted Word documents with company branding
- Implemented pre-written email templates covering 6 recruitment stages, auto-filled with candidate details for consistent team communication

- Connected a Supabase PostgreSQL database with row-level security and real-time sync, enabling the entire recruitment team to collaborate on a shared live dataset
- Deployed on Vercel with serverless API functions to securely proxy Jira credentials and environment variables
- Built analytics views showing recruiter workload, endorsement status breakdown, store coverage, and intro assignee performance

EDUCATION

TERTIARY EDUCATION

Full-Stack Web Development Bootcamp | Uplift Code Camp

2025 – 2026

Universidad De Manila | BSED Major in Social Studies

2021-2025

SECONDARY EDUCATION

San Juan National High School

2014-2018

Philippine College of Criminology

2018-2020

Awards & Certificates

Full-Stack Web Development

Uplift Code Camp | *October 2025 – April 2026*

- Developed full-stack applications using JavaScript, React, Node.js, and MongoDB
- Built responsive web interfaces and RESTful APIs
- Applied frontend and backend development best practices

Google AI Courses

Coursera | *March 2026*

- AI Fundamentals
 - Covered core concepts in machine learning and AI collaboration
 - Built foundational understanding of AI systems and workflows
- AI for Writing and Communicating
 - Applied AI tools for effective communication, content creation, and productivity
 - Improved professional writing using AI-assisted techniques
- AI for App Building
 - Learned fundamentals of building AI-powered applications
 - Topics: Natural Language Processing, Google Cloud Platform, Process Analysis

Academic Recognition — Bachelor of Secondary Education Major in Social Studies Universidad De Manila

- Dean's List (AY 2021–2025)
